

# COMPANY PROFILE

## CREATING SOLUTIONS

Scotts Global Ltd., A solutions company providing specialized services in Air Conditioning Installation, Maintenance, Evaluations, Repairs and Design. Our team includes highly qualified and experienced professionals that also perform work in Commercial, Industrial and Residential Electrical Installation, Maintenance and Repair. Our dual service offering allows us to position ourselves as a unique one-stop service provider for all Air Conditioning and Electrical projects large or small and to address any issue that may occur in any stage of a project, from inception to design, execution and completion.

## HOW IT ALL BEGAN

Company founder Rudson Scott, after spending several years in leading air conditioning operations and system design management positions both internationally and locally, and after having acquired advanced training in the maintenance, repair and design of several major types of air conditioning systems from leading companies like Carrier, Daikin and Trane, returned to Trinidad and saw a need for reasonably priced, professional, solutions orientated, air conditioning services in Trinidad and Tobago.

He set about establishing Scotts Global Ltd. In 2012, with a mission to bring his level of international experience and expertise in air conditioning and electrical systems to his home country. His vision is to offer solutions based ,quality, air conditioning and electrical systems services throughout the Caribbean and internationally. His mandate, from the very inception of the company, continues to be the generation, through the operations of Scotts Global Ltd., of a professional and customer orientated environment, that is focused exclusively on finding solutions for the air conditioning and electrical issues and needs of the customer.

Scotts Global Ltd. Is now positioned, through a unique synthesis of project management, design formulation, operations management and maintenance management techniques, to offer a complete service that guarantees accurate projections on costs and timelines, clear and precise deliverables, accountability through project status reports, and ongoing equipment functionality assessment and maintenance. In essence, we believe that once your air conditioning needs are in our hands, you can feel the cool assurance that professional, experienced, quality service brings.

**Management of maintenance contract Magdalena Hotel Tobago (600 Tons)**

**Management of maintenance contract San Fernando Teaching Hospital (1350 Tons)**

## THE SOLUTIONS WE DELIVER

One of the biggest issues encountered by companies in Trinidad and Tobago when engaging the services of Air Conditioning Service companies, is the inability of most HVAC companies to professionally handle complex ( and often even simple) air conditioning projects. Businesses, industry and residential customers frequently encounter poorly trained, inexperienced technicians and disorganized HVAC management who fail to meet deadlines or achieve the required goals and deliverables. Many businesses find themselves poorly advised on the best solutions to their air conditioning needs and wind up over-spending on equipment and services, obtaining inferior equipment which are poorly suited to their needs or having to employ several companies to do one project. Another, frequently encountered problem is poor project management and inefficient execution of job operations, which results in the loss of time and money. As a result many businesses are compelled to exert their energies attempting to micromanage air conditioning projects themselves.

Scotts Global Limited. offers a stress free experience in the development, execution, assessment and maintenance of any air conditioning project, from the simple installation or service of a residential split unit to the system design, installation, repair or maintenance of large, complex industrial Chill Water System cooling units.

You will benefit from our years of international experience in the field, resolving complex air conditioning and electrical issues. Our direct association with and training from, many major HVAC brands like Carrier among others allows us to quickly resolve any problem we may encounter in the field. We simply get the job done by affording you thorough and efficient planning and execution for your air conditioning project. We offer, also, transparency and accountability in the achievement of goals, deliverables and deadlines and the seamless delivery of all aspects of the project scope, so that you would not have to employ other agencies to complete your air conditioning or

electrical related project.

We promise, in essence, that once your air conditioning or electrical project is handed over to us, we will use our extensive technical knowledge and experience in the air conditioning industry to complete it on time and to your satisfaction, employing our a unique synthesis of project management, design formulation, operations management and maintenance management techniques, while also keeping you informed at every stage of the projects development.

Scotts Global Limited has a solution for all your Residential, Commercial and Industrial, air conditioning and electrical requirements, delivering:

## Air-Conditioning Installation, Repair, Service and Maintenance. Electrical Installation.

## AIR CONDITIONING MAINTENANCE PROGRAMME

Maintenance doesn't have to be your burden SCOTT'S GLOBAL can take care of your Air Conditioning systems and we'll make sure your systems are maintained and repaired effectively and on time. By doing so we'll also help you save money, improve the overall lifespan of your system and enhance your green credentials.

Electrical Maintenance, Installation and Repair

## THE PERSONAL APPROACH

We've gained the loyalty and trust of our clients by maintaining a personal approach to all the projects we've been involved with. It's important to keep the lines of communication open for every project, that's why we dedicate a team of key professionals to manage each project from conception to completion.

One of our project managers oversees the onsite workforce, shadowed by their very own project coordinator, who is located in our admin office. This partnership is critical to providing clients with continuity, and ensuring every project runs efficiently from design through to handover and commissioning. All onsite meetings are attended by the project manager, who provides weekly reports to raise any issues you should be aware of.
